

## ► IBAKmarine HWG

**IBAKmarine HWG** is an electrical heater with on/off or regulator switch

### System Technical Data

Certified by	DNV GL
Design	Protection class IP65 to IEC60529
Mounting location	Washrooms, showers, dry areas and stores
Features	Temperature limiter on/off or regulator switch
Cable inlet	M24 x 1.5 DIN 89280
Power requirement	230V/ 50/ 60Hz or 440V / 50/60Hz
Wattages	500W, 1000W, 1500W, 2000W

The electric marine heater type HWG is used to heat washrooms, showers, dry areas and stores. Its slim, upright design make it specially suitable for installation in areas where space is limited.

Power is supplied to the heater via a cable inlet M 24x1.5 DIN 89280 in a seawater-resistant terminal box.

The heater is supplied with a temperature limiter and an on/off or regulator switch.

It is rated IP65 to IEC60529.

Type	H x W xD (mm)	Weight (kg)	Wattage (W)	Heat Output (kcal)
HWG 500	1000 x 170 x 135	6.8	500	430
HWG 1000	1000 x 200 x 180	8.5	1000	860
HWG 1500	1000 x 200 x 180	8.5	1500	1290
HWG 2000	1055 x 310 x 180	13.2	2000	1720

IBAK also supplies electric heaters in:

- military version to VG 88974
- flat version with wattages of 300W – 2000W
