

IBAK

IBAK, founded as "Ingenieurbüro Atlas Kiel" by engineer Helmut Hunger, is today the biggest manufacturer of CCTV systems for the inspection of non-man-size pipelines and wells. For more than 60 years, customers all over the world have benefited from the great experience of this company with tradition.

IBAK designs and manufactures modular TV inspection systems with features which are unique in terms of function and technology. The great variety of products ranges from miniature electronic circuit boards, housings machined from solid materials for camera systems, equipment for pipe cleaning and leak testing, special lens systems of our own design through to complex software for data analysis and documentation. With the possible installation of the equipment in inspection vehicles of all kinds and with our after-sales service, we can offer you all services from a single company.

From IBAK!
