

► IBAKmarine S625-2000

IBAKmarine S625-2000 is a Suez Canal searchlight for ...

System Technical Data

Approval:	Lloyds Register of Shipping
Design:	Gas, pressure and watertight, seawater resistant light metal housing with divided parabolic glass reflector 624 mm, lamp changing device, cover for front glass, ventilation connection and excess pressure valve, 5m of cable 3x2.5mm ² , fork and low footing
Finish:	Structure coating, white
Lamp:	Halogen lamp 2000W/230V base GY16
Range at 1 Lx:	over 1800m / over 3 million candela
Weight:	S625 (2000W): Searchlight drum with fork and base: 47.3kg

Accessories Extra gunwale base for storage of the searchlight, protective canvas cover, 10 amp. plug, 10 amp. switch socket. Explosion-proof 16 amp. plugs and switch sockets are available for installation in hazardous areas.

Type S 625 is tested and certified by Lloyd's Register of Shipping. A Lloyd's Register Certificate has been issued for both the 2000W and the 3000W version. The luminous intensity of the searchlight with a 2000W and 3000W halogen lamp respectively complies with the regulations of the Suez Canal Authority.

Remark:

There have been reports that the Suez Canal pilots are being very strict about compliance with the Suez Canal regulations Art. 28 - Searchlight (2) and insist on vessels of more than 30,000 S.C.GT being equipped with searchlights with 3000W light sources. On vessels that fall under this regulation, we recommend using the 3000W halogen lamp version of Suez Canal searchlight S625.
