

► IBAKmarine HGL/MA

IBAKmarine HGL/MA is an electrical marine heater in a-magnetic design

System Technical Data

Design	Shock- and vibration proof, a-magnetic design
Mounting location	Washrooms, showers, dry areas and s
Features	Temperature limiter on/off or regulator switch (incorporated or in separate switch box)
Cable inlet	M24 x 1.5 DIN 89280
Power requirement	230V/ 50/ 60Hz or 440V / 50/60Hz
Wattages	500W, 1000W

The electric marine heater type HGL/MA is used to heat washrooms, showers, dry areas and stores. Its slim, upright design make it specially suitable for installation in areas where space is limited.

Power is supplied to the heater via a cable inlet M 24x1.5 DIN 89280 in a seawater-resistant terminal box.

The heater is supplied with a temperature limiter and an on/off or regulator switch.

model 'A' (IP23) or model 'B' with a connection box and separate switch box for installation in the dry areas.

Type	H x W xD (mm)	Weight (kg)	Wattage (W)	Heat Output (kcal)
HGL/MA 500	800 x 180 x 160	5.0	500	430
HGL/MA 1000	1020 x 200 x 180	8.5	1000	860

IBAK also supplies electric heaters in:

DNV GL approved design for installation on board merchant vessels

→ type HWG

→ type HACO
